

Sharpening with DMT's diamond whetstones is quick and easy. Woodworkers save at least 90% of sharpening time putting an edge on a chisel in only a few strokes. All are flat lapped and most are around 1/1000" total indicated readout. DMT whetstones resist bending, grooving or breaking, and will last for many years with normal use. The impressive range of DMT means that all manner of tools can be sharpened. Gouges, chisels, lathe tools, garden tools, knives, plane irons, router bits, etc, which make your purchase of DMT easy to justify. The DMT® revolutionary DuoSharp™ offers considerable cost saving with the convenience of a two sided diamond precision stone, simply turn the stone over to change grits. In effect you get one side for free! These stones are the ultimate in precision flatness.

DMT's unique two sided DuoSharp Whetstones.

DMT® 8" DUOSHARP WITH BASE. This 8" version of the DuoSharp has the added advantage of a continuous diamond section at one end for sharp pointed tools. Also included at no cost is the DuoBase with non-slip feet.

- DMT-WM8FC** 203 x 67mm **Fine/Coarse** Whetstone 660g**\$219.00**
- DMT-WM8EF** 203 x 67mm **Extra Fine/Fine** Whetstone 660g**\$219.00**

NOTE: The above stones have coloured dots on the surface. These are in fact small hollows in the diamond surface that allow the swarf or waste material to fall whilst cutting is in progress. This allows for a much faster cutting action than with flat stones. Also note a small solid area on one corner of the stones, this is to allow pointed objects to be sharpened without sticking in the holes.
