

We searched the globe for the finest quality pigment colours available...

*We found them*

These powder pigments are ultra-fine purity from Japan and are available in a wide range of colours. As they are a powdered mica, they are not base specific and can be mixed with any brand or type of Epoxy Resin. Further, they are even more flexible allowing you to create custom lacquer finishes and paints, even clay, glazes, slime, bath bombs, soaps, candle making and more! Just a little concentrated powder goes a very long way.

Glow-in-the-Dark (awesome multi-colour luminous!) sets, Hue (blended colour) Series Set, Neon (very vivid) Colour Sets, Colour-Shift (it's purple/no it's orange!) Set and of course, a River/Ocean specific colour pack!

Truly versatile, any of our 30 powder colours can be mixed to create unique custom shades. We are also offering some specialty ranges in sample box sets including,

*Be bold. Get creative.  
Be Colourful  
with Eye Candy!*
