- ✓ Weight: 7kg

Cross Cuts

Rip Cuts

Plunge Cuts

When sawing with a Guide Rail the cutting edge follows the scribe mark edge exactly for precise results even when mitre cutting.

The versatile HK 85 can be transformed from circular saw to groove cutter with an optional groove cutting accessory.

HK 85 is ideal for trimming and cutting of solid beams, frames, form-work that require a large cutting depth - up to 85mm.

Attach the FSK cross-cutting guide rail to the HK Saws in seconds for fast, precise angle cuts.

Lightweight and built for construction - Ideal for cutting roof battens, framing, paneling, shelving, ripping and trimming.

Versatile solution - switch from cutting full sheets to plunge cuts for sink cut outs or vents in seconds.

FS GUIDE RAILS
see page 6 for details

Job site with no power? No problem with the Cordless TSC 55 - with double battery capacity up to 36V.

Switch blades in seconds to cut a wide range of materials from cement sheet to blueboard, plasterboard, particleboard, aluminium, MDF, flooring and more!

Use with a guide rail for dead straight cuts. Scribe a line, align the guide rail and cut. Models available in a 55mm or 75mm depth of cut.

The splinterguard guarantees cuts free of tear-outs on both sides.

Easy to read and set: the dual cutting depth scale for work with and without the guide rail ensures precision every time.

Convert it to a bench saw in seconds with the compact module system - unique versatile system solutions.

Specifications

Kapex 120

- ✓ Blade Diameter: 260mm
- ✓ Cutting Capacity at 90/90: 305x88mm
- ✓ Special Cutting Capacity: 20 x 120mm
- ✓ Weight: 21.5kg

Mobile work stand

- ✓ Two Folding Extensions
- ✓ Weight: 10.1kg
- ✓ Measurement Scale
- ✓ Adjustable Legs
- ✓ Expands from 1480mm to 2400mm

Specifications

- ✓ Frequency range FM (VHF): 87.5-108Mhz
- ✓ Battery-interface (Festool sliding batteries): 10.8 - 18V
- ✓ Speaker: 10 watt neodymium speakers for room-filling sound with digital sound processor that automatically adjusts bass 
- ✓ Amount of station memory: 4
- ✓ Bluetooth compatible for streaming own music or hands free phone use. 
- ✓ Aux-in input: 3.5mm for connecting MP3 player
- ✓ Weight (without battery): 0.7kg

12" capacity in a 10" saw - cut skirting boards up to 120mm in height.

Weighing only 21.5kg, the KAPEX is quick and easy to set up, pack up and transport particularly when connected to the mobile work stand.

Dual line laser of the Kapex marks the exact width of the cut so the workpiece can be positioned from the left or right.

Bluetooth interface and built-in speakerphone can listen to music from your smartphone and radio stations.

Durable and sturdy plastic housing, the splash-resistant 2.5 inch speakers and the flexible antenna ensure that SYSROCK is built for the worksite.

To make sure nothing gets in the way of your music enjoyment, SYSROCK combines excellent sound quality with a compact lightweight design.

Pair a Festool Power Tool with a Dust Extractor & **SAVE \$100***

A range of system accessories allow you to upgrade to a complete sawing station with minimal effort. Even cross cutting sections up to 803 mm on both the floor and set version.

With an impressive cutting path for rip cuts and cross cuts you also have the ability to cut at 45°.

Strong but lightweight - the honeycomb design of the PRECISIO makes the aluminium-steel base frame both stable and easy to carry.

When sanding, planing, joining or routing with templates, it is important that the workpieces is held firmly on the table.

The guide rail adapter with hinge attaches the rail to the MFT table and slides effortlessly to produce perfectly straight cuts.

The V-groove around the outer edge of the MFT allows for the connection of the CMS system, as well as collection of available, sliding tables, mitre guides and stops.

PF 1200 Now with Cover for repair costs

wearing parts included

On top of the Service-All Inclusive Package that comes as standard with all Festool Tools, is a **NEW** cost protection guarantee for 36 months - exclusive to the PF 1200

What is cost protection?

A 36-month complete service cover with **all servicing and repairs free of charge**, including material and manufacturing defects as well as wearing parts.

So you can be sure you won't receive any unwanted invoices for repairs.

*Conditions apply see www.festool.com.au/sai for details.

Sweeping curves and tight corners are made effortless with the triple blade guide and adjustable carbide jaws securing the blade in position.

Lightweight and easy to handle. Available in either a barrel grip or D-handle design.

FastFix blade change system makes switching between cutting different materials quick, easy and tool-free.

Festool offers a complete system solution that will take the result right to the edge in a range of aluminium composite materials like Alucobond or Alupanel.

The feeler roller allows you to adjust the routing depth to suit the material thickness you are working with.

When paired with the Festool dust-extraction and 36mm hose, faultless v-grooves are produced to professional standards without a trace of any chips.
