

1. Choose the appropriate template for the radius you want to cut.
2. Attach the fence to the template, making sure that it snaps securely in place.
3. Position the fence and template on the corner to be routed, making sure that the fence tabs contact both edges of the workpiece. This guarantees proper positioning.
Note: If the radius to be routed is greater than 1", use a band saw or jigsaw to remove most of the material outside the radius.
4. Set the router bit depth so that the bit's guide bearing is aligned with the template edge.
5. Using the fence finger hold for a secure grip, rout the radius by moving the stock in the direction shown on the fence.
Note: Keep hands clear of the bit at all times.

Important Safety Instructions

1. This tool is designed for specific applications as defined in the instructions and should not be modified and/or used for any other applications.
2. Before using the Rockler Corner Radius Routing Template read, understand and follow all instructions and safety information provided.
3. For any tool that is used in conjunction with this product always read, understand and follow the instructions and safety warnings for that tool.
4. Before using this product, review and verify that all tools used with it are in proper working order as defined by the tool's owner's manual.
5. All safety equipment must be installed and working properly as defined by the tool's owner's manual.
6. Do not use this product until you have read the provided instructions and warnings and are confident you understand them.
7. Always wear safety glasses in compliance with ANSI safety standards and hearing protection and follow all standard shop safety practices including:
 - A. Keep your work area well lit and clean.
 - B. Use dust collection tools and dust face masks to reduce exposure to dust.
 - C. Use accessory safety equipment such as feather boards, push sticks, and push blocks whenever appropriate.
 - D. Do not use power tools in explosive environments, e.g. in the presence of flammable liquids, fumes or dust.
 - E. Keep children and bystanders away while operating your tools.
 - F. Maintain proper footing at all times and do not overreach.
 - G. Do not force the tool.
 - H. Unplug all power tools before making any adjustments or changing accessories.
8. Remain alert and use good judgment when using this tool. Do not use this tool if you are in any way impaired by medications, alcohol, drugs or fatigue.
9. Dress appropriately and remove all jewelry, secure loose clothing and tie up long hair before using this tool.
10. It is the sole responsibility of the purchaser of this tool to ensure that any third party reads and agrees to all the safety precautions outlined in this manual prior to using the tool.
11. Maintain these instructions and warnings as long as you own the tool. Keep in a place where they will be readily available for reference.
12. The user assumes all risk for the proper use of this tool and for ensuring product suitability for intended application.
13. These warnings and instructions do not represent the total of all information available regarding tool safety, use and technique. Always seek out opportunities to learn more and improve your skills and knowledge.
14. Maintain awareness of the router bit at all times while cutting.
