

FESTOOL

Making light work of sanding.

ETS 150 Eccentric sander.

No compromises!

ETS 150 eccentric sander

At a glance.

Is it possible to make a successful product even better? – We can.

Festool always has perfect sanding performance in sight and your comfort in mind. That's why we've improved the ETS 150 sanders - to make your job even easier. Softgrip has been added for a better grip and more ergonomic operation. The control electronics keep the speed of the pad constant, even

under load, ensuring consistent surface quality and also allow you to adapt the speed to the material. Together, they give you an excellent finish - without fatigue. Other benefits include optimised sturdiness and an even longer service life. This is all part of the ETS 150. With just 1.8 kg, it is the lightest in its class.

Unshakeable performance.

The electronics are fully protected by a rib- and fibre-reinforced plastic housing.

All the benefits in your hand.

A firm grip on everything - with Softgrip, the ETS 150 becomes an extension of your hand.

Outstanding handling.

Lightweight and perfectly balanced, with the ETS 150, you'll get a fine finish without fatigue or tingling in your hands.

Uncluttered workplace.

A single plug it lead can be used to power a wide range of tools - eliminating tangled cables.

Consistent results.

With variable speed and MMC electronics, you can match the speed to the material and keep it there - even under load.

No re-work.

A brake maintains the pad speed when not under load, so there's no gouging of the surface on initial contact.

Stable application.

The high-performance bearings absorb even the hardest shocks and are more durable than conventional bearings.

Good contact.

The durable MPE StickFix sanding pad is made to last and makes changing abrasives a breeze.

Tidy work.

The Jetstream extraction system effectively removes dust and extends the life of your abrasives.

ETS 150 Eccentric Sander

Effortless sanding in all areas.

Handling

A well-engineered solution.

Fatigue-free sanding in any situation - even overhead. With the combination of Softgrip and ergonomic handle, the ETS 150 fits your hand like a glove.

Easy guidance enables you to sand surfaces and profiles thoroughly. And the tool does all the work, so you don't need to apply any force.

You can also change the sanding speed to suit the material for perfect results. Or simply switch to a sanding pad that better suits the material.

And should anything happen: The reinforced housing of the ETS significantly improves the protection of the electronics against damage caused by dropping the tool.

High power and low weight - the ETS 150 weighs just 1.8 kg.

The right grip allows for effortless work.

Handling

Quality in every phase.

The ETS 150 is a true all-rounder and offers the user a wide range of options. This enables you to work both on large surfaces and in detail. The ETS covers the entire spectrum of sanding applications from intermediate sanding to finishing.

Whether layers of paint, window frames or natural wood: when light sanding, the ETS 150 with sanding pad brake is always the right choice. You will achieve an optimum material removal rate and maximum surface quality.

It is equally suitable for surface sanding. Whether sanding over metal surfaces, filler areas on gypsum plasterboards or overlapping wood grains in corners - the ETS 150 is completely in its element, even in critical areas.

The patented Festool Jetstream principle is a key element of the superior performance of the ETS 150 sander. Dust extraction is optimised, the abrasive wears evenly and without clogging. The benefit for you: a perfect finish with no need for re-work.

The eccentric sander ETS 150/5 is best suited for intermediate to fine sanding, while the ETS 150/3 is ideal for fine sanding and finish polishing.

The soft sanding pad D 150 HT (resistant to high temperatures). Ideal for edge-sanding up to a grit of P 220.

Temperature of the sanded surface after 2 minutes - with the 9-hole jet-stream principle.

Temperature of the sanded surface after 2 minutes - with a conventional 6-hole system.

ETS 150 Eccentric Sander

Efficient sanding with a complete system.

Durability

Optimum durability.

A well-built eccentric sander is really durable. The solid construction of the ETS 150 - both inside and out - guarantees a long service life.

The robust, impact-resistant housing securely protects your investment, yet the ETS 150 is the lightest sander in its class.

All the internal components are built to withstand vibration, impact and heat - from the sophisticated bearing assembly to the lubricant. And the perfectly fitted housing seal keeps out dust.

Along with durability, reliability and ergonomics, the ETS 150 offers you yet another factor for success: high economic efficiency.

The strong outer wall makes the bearing stable.

Systems

A powerful team for the best possible performance.

Regardless of whether you're sanding wood, paint or automotive parts, your results will improve when you use a well-designed system. The Festool sanding system is the optimum solution: the tool, sanding pad and abrasive are designed to work as a unit. Add in exceptional dust extraction and you have a complete sanding solution and that makes all the difference.

ETS 150 Eccentric Sander

Specifications, accessories and consumables

Eccentric Sander ETS 150/3

- Ideal fine finishing sander with a 3mm sanding stroke.
- Ergonomic and comfortable due to Softgrip.
- Protects workpiece from damage with the sanding pad brake.

Versions

ETS 150/3 EQ-Plus In a Systainer Order No.: 571549	ETS 150/3 EQ In a box Order No.: 571548
--	---

Scope of delivery: 1 Stickfix sanding disc, 1 filter cassette, 1 Stickfix sanding pad D 150, operating tool

Power consumption	310 W
Speed	6000 – 10,000 rpm
Working strokes	8000 - 20,000 rpm
Sanding stroke	3 mm
Interchangeable sanding pad	STF, dia. 150 mm
Dust extractor connection diameter	27 mm
Weight	1.8 kg

Eccentric Sander ETS 150/5

- Ideal intermediate to fine finishing sander with a 5mm sanding stroke.
- Ergonomic and comfortable due to Softgrip.
- Protects workpiece from damage with the sanding pad brake.

Versions

ETS 150/5 EQ-Plus In a Systainer Order No. 571551	ETS 150/5 EQ In a box Order No.: 571550
---	---

Scope of delivery: 1 Stickfix sanding disc, 1 filter cassette, 1 Stickfix sanding pad D 150 for 571551 and 571550 soft version, operating tool

Power consumption	310 W
Speed	6000 – 10,000 rpm
Working strokes	8000 - 20,000 rpm
Sanding stroke	5 mm
Interchangeable sanding pad	STF, dia. 150 mm
Dust extractor connection diameter	27 mm
Weight	1.8 kg

StickFix sanding pad

Description and application

ST-STF-D150/8-M8 H, hard
High edge firmness; for even surfaces and narrow edges.
Order No.: 484850*

ST-STF-D150/8-M8 W, soft
Standard pad; for universal use on even and curved surfaces.
Order No.: 486381*

ST-STF-D150/8-M8 W-HT, soft HT
Burs that are resistant to high temperatures; for sturdy use on grits up to P 220.
Order No.: 491935*

ST-STF-D150/8-M8 SW, supersoft
Elastic structure; for extreme curves and bends.
Order No.: 486382*

Interface pad
IP-STF-D145/8-STF/2
Cushioning device between the sanding disc and sanding pad for Titan abrasives.
Order No.: 492212*
